

Algebra: Plotting Points in the X-Y Plane

N

Practice Worksheet • numberbender.com

Name: _____ Date: _____ Score: _____

DIRECTIONS Identify the quadrant or axis location of each point, and state the coordinates of the described point.

1 Name the quadrant:

(3, 5)

Answer: _____

2 Name the quadrant:

(-2, 4)

Answer: _____

3 Name the quadrant:

(-5, -3)

Answer: _____

4 Name the quadrant:

(6, -1)

Answer: _____

5 Name location:

(0, 4)

Answer: _____

6 Name location:

(-3, 0)

Answer: _____

7 Name the quadrant:

(7, -9)

Answer: _____

8 Name the quadrant:

(-1, -8)

Answer: _____

9 Find the point:

4 units right,
3 units down from origin

Answer: _____

10 Find the point:

5 left, 2 up
from origin

Answer: _____

Answer Key & Solutions

TEACHER NOTES

Q1: (+,+), Q2: (-,+), Q3: (-,-), Q4: (+,-). Points on axes are not in any quadrant. x-axis: $y=0$; y-axis: $x=0$.

1 (3, 5)

= Quadrant I

Both x and y positive $\rightarrow$ Q I

2 (-2, 4)

= Quadrant II

x negative, y positive $\rightarrow$ Q II

3 (-5, -3)

= Quadrant III

Both negative $\rightarrow$ Q III

4 (6, -1)

= Quadrant IV

x positive, y negative $\rightarrow$ Q IV

5 (0, 4)

= y-axis

$x=0 \rightarrow$ on the y-axis

6 (-3, 0)

= x-axis

$y=0 \rightarrow$ on the x-axis

7 (7, -9)

= Quadrant IV

x positive, y negative $\rightarrow$ Q IV

8 (-1, -8)

= Quadrant III

Both negative $\rightarrow$ Q III

9 4 right, 3 down from origin

= (4, -3)

Right = $+x$, down = $-y \rightarrow (4, -3)$

10 5 left, 2 up from origin

= (-5, 2)

Left = $-x$, up = $+y \rightarrow (-5, 2)$
